Comments:

Thunderstorms are rapidly building along a southward moving outflow boundary currently along Hwy 87. These storms are expected to affect portions of the Saguaro, Canyon, and Apache Lake recreational areas. Stronger storms will be capable of producing frequent lightning strikes along with brief heavy rainfall and gusty winds around 30-40mph. Boaters, as well as those on shore hiking/camping, will need to use caution as these storms move through the recreational areas over the next hour.
